

**Subject: Important Update Regarding Import Tariffs and Potential Impact on Your Orders**

Dear Valued Customer,

This letter serves to inform you of a recent increase in importation tariffs imposed by the United States government, effective April 5, 2025. This policy change will impact the cost of goods distributed by MH&W International Corporation.

MH&W International Corporation is actively working to minimize the effect of these tariffs on our customers. We are leveraging our established supplier partnerships to explore all available avenues to continue providing high-quality products at the most competitive prices possible.

Regrettably, the magnitude of these additional tariff costs necessitates that a portion of these expenses will need to be passed on to our customers. This adjustment may affect existing open orders and previously agreed-upon quotations.

We are currently engaged in thorough discussions with our suppliers and consulting with industry tariff experts to fully understand the implications of these changes and identify further mitigation strategies for our customer base.

During this period, MH&W International Corporation remains committed to providing the highest level of service and product quality. We will continue to closely monitor tariff updates and will make necessary adjustments should the regulations change.

We deeply appreciate your ongoing support and value our partnership. We remain optimistic about our future together.

Sincerely,

MH&W International Corporation
